

III. Remarks

A. AMENDMENTS TO THE SPECIFICATION:

Instruction 1: The title of the specification has been changed to remove the word “Improved.”

Instructions 2: Paragraph [00023] has been replaced and includes sentences from paragraph [00013] of the originally filed specification. Namely, the second sentence of replacement paragraph [00023] is fully supported by the second sentence in original paragraph [00013]; the third sentence of replacement paragraph [00023] has merely been moved from its original position; the fifth sentence of replacement paragraph [00023] is fully supported by the first sentence in original paragraph [00013]; and the sixth sentence of replacement paragraph [00023] is fully supported by the third sentence in original paragraph [00013]. Accordingly, the replacement paragraph [00023] adds no new matter.

Instructions 3-4: Paragraphs [00025] and [00038] have been replaced. The amendments to these paragraphs are merely cosmetic and have been made to correct typographical errors encountered during a review of the specification. Because the replacement paragraphs of [00025] and [00038] merely correct typographical errors, no new matter has been added.

B. AMENDMENTS TO THE CLAIMS:

Original claim 1 has been amended, and new claims 2-32 have been added. The amendments to the claims are fully supported by the originally filed specification. For example, each of the following claims is at least supported by the following portions of the originally filed specification:

Claim	At least Supported by:
1	Paragraphs [00013] and [00015]
2-3	Paragraph [00013]
4-6	Paragraphs [00014] – [00015]
8-32	Paragraphs [00011] – [00040] and Figures 1-4

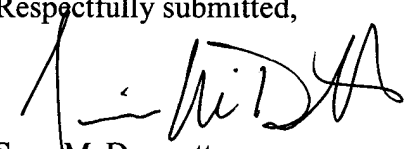

C. DRAWINGS:

Please accept the formal drawings attached to this paper. The formal drawings are fully supported by the originally filed disclosure and do not add new matter.
